

DARCY  
HEALTHCARE

# Your health, first.

Where expert  
diagnostics meet  
cutting-edge care.

[darcyhealthcare.co.uk](https://darcyhealthcare.co.uk)

Diagnostics. Treatment. Recovery.

# Diagnostics

Darcy Healthcare is a state-of-the-art diagnostic hub delivering rapid, accurate, and patient-focused care through the latest in medical technology and specialist expertise.

**Appointments available  
to book today!**

## Self-referral available

Increasingly, patients are seeking healthcare options that provide faster, easier, and more convenient access to medical services. One of the options is for patients to self-refer for diagnostic scans. The option provides a solution to the twin problems of prolonged waiting times for initial clinician assessment and for diagnostic tests that could lead to delays in diagnosis. Self-referral offers patients greater control of their own healthcare and reduces the anxiety of waiting for scans.

## MRI SERVICE

We can perform MRIs of all body regions to diagnose many acute or chronic conditions including those affecting the musculoskeletal, gastrointestinal, neurological or cardiovascular systems.

MRI can also be used to assess gynaecological conditions and the prostate. Scans are performed in our modern, comfortable facility and reviewed by expert radiologists, with a detailed report sent to your doctor to support your care.

## WHEN MIGHT YOU NEED AN MRI SCAN?

An MRI scan is used to investigate or diagnose conditions such as:

- Soft tissue injuries to ligaments or tendons.
- Joint injury or disease.
- Spinal injury or disease.
- Injury or disease of internal organs including the brain, heart and digestive organs.
- Tumours.

# ULTRASOUND SERVICE

An ultrasound scan is a medical test that uses high-frequency sound waves to create images of the inside of your body. It is a safe and painless procedure that can diagnose various conditions.

Here are some of the most common reasons why you might need an ultrasound scan with Darcy Healthcare:

- To check the liver, kidneys, gallbladder, pancreas, or thyroid.
- To check for testicular problems.
- To diagnose joint, muscle, or tendon problems including many types of sports injury.
- To check for vascular problems.
- To enable precise injection treatment for arthritis and other conditions.

# ULTRASOUND GUIDED TREATMENTS

We offer a range of ultrasound-guided injection therapies for conditions including inflammation of soft tissues and joints as seen in arthritis and tendinopathy.

We can offer several types of therapy, depending on what your referring clinician and our specialists deem most appropriate for your complaint.

All procedures can be performed in a clinic setting with appointment times ranging from 10 to 30 minutes on average. These include:

- Corticosteroid injections
- Hyaluronic acid preparations
- Platelet-rich plasma (PRP)
- Dry needling
- Hydrodilatation of the shoulder
- Hydrodilatation of the Achilles tendon
- Prolotherapy

## BACK PAIN CLINIC

Our back pain clinic is designed so that the scan, diagnosis, assessment and treatment are all delivered in one single visit. A process that may take weeks elsewhere is all delivered within 2 hours.

Low back pain is a prevalent problem affecting many individuals at some stage. At Darcy Healthcare we offer two options, either an MRI scan of your lumbar spine with results to be sent to your GP or healthcare practitioner. Or our specifically designed 'All-in-One' Back Pain Clinic tailored to help you quickly recover.

## ALL-IN-ONE BACK PAIN - £435

Our specially designed back pain clinic gets you back on the road to recovery with the following process.

### How it works?

**Step 1** - High-quality MRI scan of the lumbar spine.

**Step 2** - Your scan is immediately assessed and reported by our specialist radiologist.

**Step 3** - You will then be assessed by our advanced physiotherapy practitioner.

**Step 4** - Our team will draw up a tailored plan for your treatment and recovery.

# SPORTS INJURY CLINIC

## DIAGNOSIS & RECOVERY

The Sports Injury Clinic provides a multi-disciplinary team (MDT) approach to optimise health, well-being, and human performance.

Our Sports Injury Clinic delivers a holistic, multidisciplinary approach to rehabilitation and high-performance recovery. Designed for recurring, complex, or stubborn injuries, the clinic brings together expert care in one streamlined appointment including:

- Thorough review of the problem to date
- Full clinical assessment and diagnostic ultrasound (if required)
- Detailed discussion of condition and imaging results
- Recommendation of the most appropriate treatment or next steps
- Immediate start to recovery plan, which may include:
  - Further imaging
  - Injection treatments
  - Bespoke rehabilitation programme

# NEW! PROSTATE CLINIC

**Did you know?**  
**1 in 8 men will get prostate cancer**

## Our comprehensive Prostate Clinic

Darcy Healthcare have developed a prostate evaluation process, the only one of its kind in private healthcare, that includes 5 key tests to best evaluate the health of your prostate.

We've developed a prostate evaluation process, the only one of its kind in private healthcare, that includes 5 key tests to best evaluate the health of your prostate. These are standard-of-care tests that would be utilised within the NHS, however, rather than requiring up to 10 appointments and weeks of waiting for results and your next appointment, we're delivering this all in one day.

**The all-in-one prostate evaluation**

# SPRINGBOK ANALYTICS

Darcy Healthcare has partnered with Springbok Analytics to provide personalised 3D muscle reports, creating a digital twin of your muscle structure for detailed analysis.

It's a tool that significantly helps deliver personalised care to help you reduce the risk of injury, recover from an injury or optimise your performance through an objective assessment to determine if your muscle health is optimised for your sport and/or lifestyle.

## 01 Scan

A non-invasive, MRI scan (20-45 minutes, depending on selection) captures a full, detailed image of muscle health.

## 02 Process

Our advanced technology transforms raw imaging data into precise; 3D muscle analytics.

## 03 Report

Receive reports with comprehensive 3D models and benchmarking to track trends and support goals.

## Did you know? We offer:

### Self-referral

At Darcy Healthcare, we welcome self-referrals, making it easier and faster for you to access expert diagnostic services and specialist clinics. Simply submit your details, and our clinical team will assess your suitability.

In some cases, we may require a referral from a healthcare professional such as a GP, hospital consultant, physiotherapist, osteopath, chiropractor, or podiatrist, but many patients can begin their journey with us directly.

### iGP

Introducing iGP by Darcy Healthcare – a brand-new integrated primary care service now offered directly by Darcy Healthcare. iGP brings high-quality, convenient General Practitioner appointments online.

With fast access to medical professionals, streamlined referrals, and coordinated care planning.

We are registered with the following Health Insurance providers

**DARCY  
HEALTHCARE**

**“Lovely staff, exceptionally  
well treated by all those involved.  
Would recommend for anyone  
requiring an MRI scan”**

**Don't allow waiting times  
to delay your diagnosis.  
Book your consultation today.**

### **Our Location**

Llandarcy Academy of Sport, Llandarcy Park, Llandarcy, Skewen, Neath SA10 6JD

### **Darcy Pay**

Darcy Pay is a convenient three-month payment option offered by Darcy Healthcare, designed to make private medical treatment more accessible and affordable. Patients can spread the cost of their treatment over three equal monthly instalments, helping to ease the financial burden without compromising on the quality or speed of care.
